

Step 1: Sign in to GitHub

1. Open your web browser and go to <https://github.com/>.
2. Sign in to your GitHub account using your credentials.

Step 2: Create a New Repository

1. Click on the "+" icon in the top-right corner of the page.
2. Select "New repository" from the dropdown menu.
3. Enter your enrollment number as the repository name.
4. Optionally, add a description for your repository.
5. Choose whether the repository should be public or private.
6. Click on the "Create repository" button.

Step 3: Add the actual file where we would store our assignment

1. Go to the folder inside which you want to create another folder
2. Click on *New file*
3. On the text field for the file name, first write the folder name you want to create
In this case I name it "Assignment 1"
4. **Then type** `/` . This creates a folder
5. You can add more folders similarly
6. Give the new file a name
7. Finally, click *Commit new file*.

Step 4: Add the Figma file in our "Assignment 1"

1. Open the folder "Assignment 1"
2. Click on "Add file" in the top right corner
3. Click on upload file
4. Drag and drop/choose the Figma prototype file
5. Commit changes
